

## Design Sprint Day 3

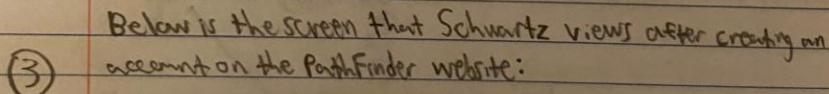

2022-02-20

Recent high school graduate Aaron Schwartz has the goal of becoming an airline pilot, but is not sure of the requirements of becoming one.

Schwartz researches (online) the requirements for becoming an airline pilot, and on a website witnesses an advertisement for PathFinder.

Enter your dream job below to find your path:

I←

Go!

User text input field

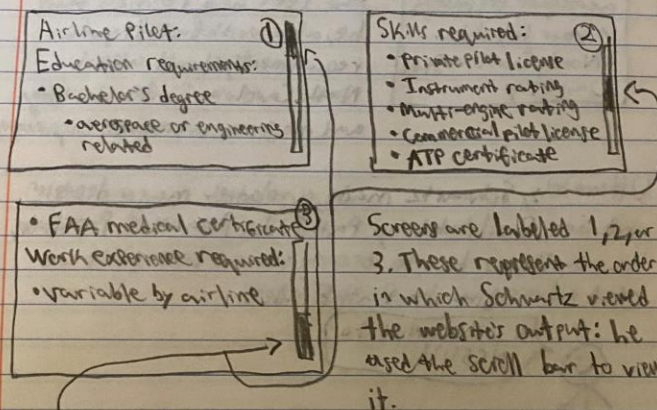

Cursor (Schwartz types here)

Button

Schwartz types "airline pilot" into the textbox and clicks the "Go!" button. PathFinder uses the text input.

④

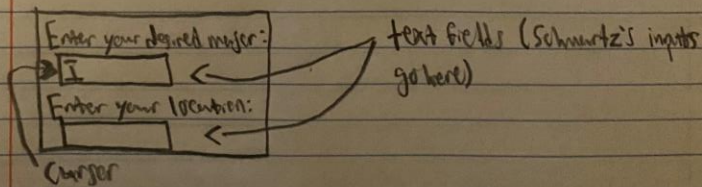

The following is the screen that Schwartz views after clicking the "Go!" button:

Scroll bar (notice how its position changes). This represents Schwartz using the scroll bar

⑤

Inspired by his new-found knowledge, Schwartz decides to search for schools offering aerospace engineering as a major.

In the upper field, Schwartz types "Aerospace Engineering".  
In the lower field, Schwartz types "North Carolina, USA".

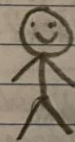

⑥

Institutions offering  
aerospace engineering  
in your location:  
• North Carolina State  
University

Schwartz views the screen on  
the left and realizes that  
he, along with fulfilling other  
requirements, should attend  
North Carolina State University  
and major in aerospace engineering.

⑦

Ultimately, Schwartz made a relatively major decision  
and was facilitated by PathFinder. Because of Pathfinder,  
he now knows how to become an airline pilot and  
used advice given by Pathfinder.

I just applied to  
NCSU!!
