Job

Drop Down

The sketch below is an example of how I envision a drop down menu in the navigation bar to allow users to select their area of study. This will help users filter down some of the employers.

PathFinder

Sign-Up
Log-In

Area of study

- Comuter Science
- Marketing
- Accounting
- Biology
- .
- .
- .
- .

Database for Job Requirements feature (used in initial release of MVP to hold all information related to jobs that users may search for)

Database for Job Requirements:

Job	Education Required	Experience Required	Skills Required
Job A	Master's degree in var Ph.D preferred	Minimum 5 years in var	~~~~~ ~~~~~
Job B	Bachelor's degree in var	Minimum 3 years in var	~~~~~ ~~~~~ ~~~~~

device screen database in table format

There are many jobs that potential users may desire. In accordance with the concept of MVPs deploying with minimum features, Pathfinder will access information in terms of desired job requirements through a database. At minimum, the database will contain information on jobs regarding required education and experience levels as well as skills.
