

Goal:

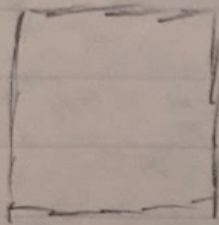

The goal of the product named PathFinder is to help students build a path to achieve the desired job they want after completing their education. PathFinder will show guides on how to improve technical skills and give students opportunities such as internships to help on their journey to get a job.

Feature List:

- Job/internship search and filter feature
- Job/internship applying feature
- In-depth job description feature
- LinkedIn account linking feature
- Resume & interview tips/advice list feature
- Resume prep and workshop feature
- Personal profile feature
- Location input
- Database for job requirements
- Secondary database for general requirements for job groups
- Students can attach resume to profiles
- Experience/level filter
- Job/Internship bookmark system
- Q & A feature

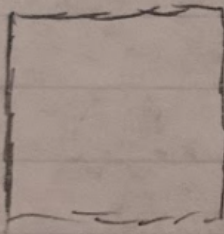

Solution Sketches:

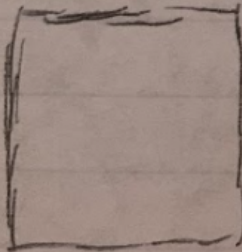

Sketch #1: Generated Job List

Logo

Company Name: _____
Description: _____
More Details: _____

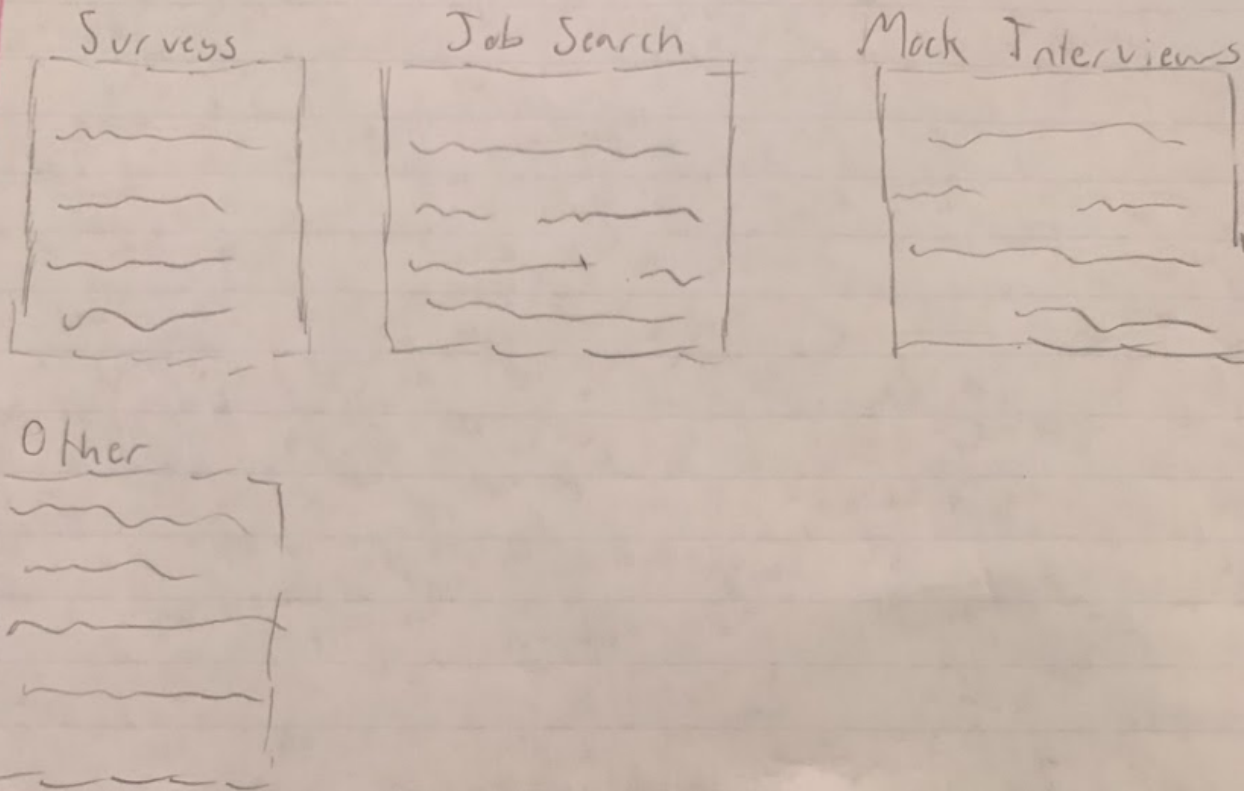

Page 1 2 3 4 ... 10

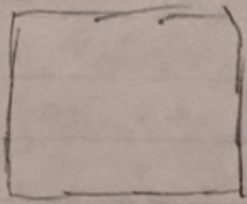

*A generated job list is formed after the user uploads all experience they have

Sketch #2: Main Hub of Website

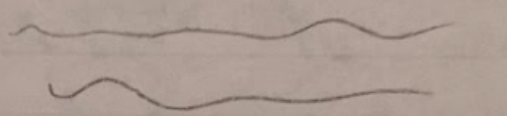

*Main hub of the website is where you can find all of the information you need divided up into sections so it is organized.

Sketch #3: Customizable Profile

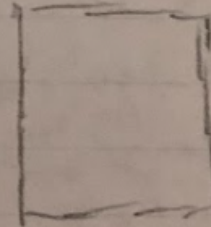

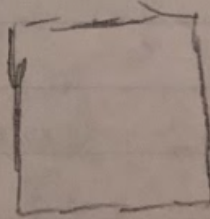

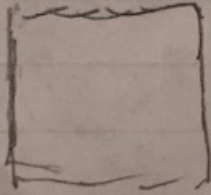

Icon

About Me:

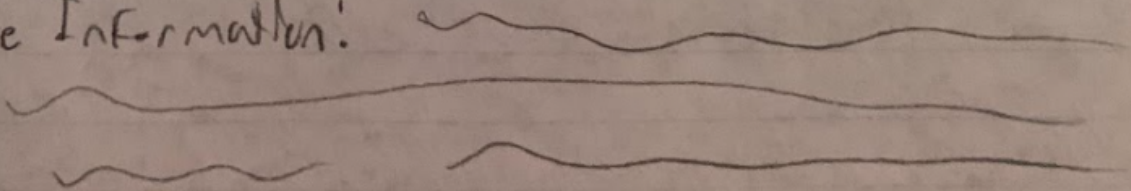

Resume:

Connections:

More Information:
