Design Sprint Day 2

Goal: The goal of Pathfinder is to give students the opportunity to find internship and employment opportunities that will benefit them and their career success.

Group Feature List
- Job/internship search and filter feature
- Job/internship applying feature
- In-depth job description feature
- LinkedIn account linking feature
- Resume & interview tips/advice list feature
- Resume prep and workshop feature
- Personal profile feature
- Location input
- Database for job requirements
- Secondary database for general requirements for job groups
- Students can attach resume to profile
- Experience/level filter
- Job/Internship bookmark system
- Q & A feature

Solution Sketches:

Personal Profile: users can customize a personal profile that can be viewed by employers and other users. Allows them to input information such as email, profile picture, name, pronouns, resume, etc.

embedded resume

upload resume

Profile features can be edited at any time. A resume can be attached by emdedding a word doc or a pdf, and it will be displayed on the profile. The icons on the left underneath the profile picture could be a friend's list or past employment, perhaps even both.

Job/Internship Search and Filter Feature: This will essentially be the website's homepage. Users can see jobs and internships that appear in their area, and then can search for specific jobs or filter through the opportunities.

The job feed first prioritzes listings based on the user's location. The user can then specify what kind of job they want and where with the two bars at the top of the screen. On the far right side the user can add additional filters to their search. Filters include: differentiating between internship and job, salary, specific positions, etc.

Resume Prep and Workshop Feature: This is a place for users (primarily students) to create their resumes and gather feedback from advisors at their school, or potentially other users.

Some Guy's Resume

The user can upload their resume to their advisor, and the advisor can make comments which are shown to the user (the nodes on the right side of the site). On the advisor side, they will be displayed a list of their student's resumes and will have the ability to highlight parts of the resumes and make comments.
